EDUCATION

Western University

Sep 2023 – May 2028

Bachelor of Science, Computer Science (Co-op)

London, ON

- **Relevant Courses:** Data Structures & Algorithms, Software Engineering, Operating Systems, Databases, Information Systems & Design, Machine Learning

EXPERIENCE

KPMG

May – Aug 2025, May 2026 – Present

Solutions Engineer Intern

Toronto, ON

- Engineered 10+ JavaScript intranet pages backed by the **SharePoint REST API** with automated request routing, processing 500+ firmwide submissions and cutting turnaround by 45%
- Automated SharePoint cleanup with **PowerShell**, deleting old file versions across **400+ site collections** to recover **50+ TB** of storage, using dry runs and batching to enforce retention policy without data loss
- Developed an EN/FR translation agent in Copilot Studio, integrating **MCP** servers to pull firm terminology at runtime and cutting mistranslation of KPMG-specific terms by **99%** across firmwide documents

PDA Evaluations

Jan 2026 – May 2026

Software Engineer

Remote

- Migrated a legacy Google Sheets stat-keeping workflow to a normalized **PostgreSQL** database, designing the relational schema and authoring **Sequelize** migrations to port **20K+ historical records** with zero data loss
- Shipped a stat-tracking platform with a React + TypeScript frontend on Cloudflare and a Node.js REST API on an **AWS EC2** instance, serving **30+ users** and cutting manual data-entry time by 75%
- Scheduled **cron** health checks on AWS EC2, alerting on failed syncs and sustaining **99%+ uptime**
- Automated **CI/CD** deploys gated on tests and staging, auto-applying **Sequelize** migrations on release

LEADERSHIP

KILOGRAPH

May 2026 – Present

Co-Founder

Toronto, ON

- Grew to **3 paying B2B clients** in 4 months on a 3-person founding team, running technical consultations and owning product, sales, and **hands-on client deployments**
- Co-created **Decision Schema**, infrastructure that makes companies AI-legible, driving inbound leads by turning offers, pricing, and proof into signals **agentic search** can trust and recommend

Western Developer Society

Oct 2024 – May 2025

Software Developer

London, ON

- Deployed a full-stack mobile app to manage autonomous campus robots, under the supervision of Dr. Yili Tang
- Implemented **15+ REST API routes** with Express.js and TypeScript, and optimized SQL queries for robot state tracking and operational analytics, reducing data retrieval latency by **40%** across 10K+ logged operations

PROJECTS

SunPay – Best Authentication Integration at HackThe6ix 2026 | *TypeScript, SQL, Shadcn*

Jul 2026

- Built a payment service that splits one big group purchase across members, instantly charging each member's saved card through the **Stripe API** in a **Next.js/TypeScript** app
- Tracked balances on a **SQLite** double-entry ledger, verifying handoffs with **signatures** and **Auth0** step-up MFA

Macrova – AI-Powered Nutrition App | *Python, FastAPI, Pydantic, Flutter, Docker*

Mar 2026

- Architected an AI engine generating personalized **1–7 day meal plans** via deterministic backtracking search.
- Designed a failure-driven **LLM feedback loop** that parses planner deficit reports and generates USDA-validated recipes to recover infeasible plans, keeping the constraint solver fully deterministic and free of LLM calls
- Shipped a Flutter mobile client on a Dockerized FastAPI backend with **60+ pytest cases** and CI/CD

SKILLS

Languages: Python, Java, C/C++, TypeScript, JavaScript, Dart, SQL, Bash, PowerShell

Frameworks & Libraries: React, Next.js, Flutter, Node.js, Express.js, FastAPI, Flask, Sequelize, Pydantic, D3.js

Databases: PostgreSQL, MySQL, SQLite, Supabase, Snowflake

Cloud & DevOps: Amazon Web Services (AWS/EC2), Cloudflare, Docker, CI/CD, GitHub Actions, REST APIs

Dev Tools: Git, GitHub, Vite, VS Code, Jupyter, Jira, Figma, Claude Code, Cursor
